NEW PRODUCT RELEASE

MINIDEK

Digi-Data Corporation announces MINIDEK, a mini-peripheral for a mini-system at a mini-price. Some of MINIDEK's specifications are: digital tape unit: IBM computer compatible: 7 or 9 track: 200, 556, 800 or 1600 BPI: NRZI or phase encoding: 12.5 ips: 7 inch (600 ft.) reel maximum: write/read or read after write or write only or read only. MINIDEK is available with an OEM interface (including read and write amplifiers, motor controls and power supplies) or with an interface which is fully formatted to IBM computer compatible specifications. MINIDEK is designed for easy interfacing to IC systems, in fact, it is fully compatible with many existing controllers.

Priced at $1,450 in quantities of 100.
